

# PC Assembly (LAB)

Name: LEW SHU BEI

Matric Number: A22EC8002

**Before**

**After**

# Self Reflection

This lab assessment helped me learn how to assemble and disassemble a computer. I was able to see the physical appearance of the hardware components that are used in the computer and how they are connected. This lab activity enhanced my understanding of the process of assembling a computer and the functions of each component. After the lab, I am given a short quiz to test my understanding about this activity.
